SCHIESS
Werkzeugmaschinenfabrik GmbH

For over 160 years, SCHIESS has stood for precision, reliability, and technical excellence at its Aschersleben location. As a subsidiary of the globally active AGC GROUP, SCHIESS Werkzeugmaschinenfabrik GmbH develops and manufactures XXL-format portal milling machines, vertical lathes, boring mills, and grinding machines, meeting the highest demands of industrial projects worldwide.

To strengthen our team in Aschersleben, we are currently seeking:

Commissioning Engineer (m/f/d)

Your Profile:

- Completed training as an electrician, electrical technician, electrical fitter, electronics technician, electrical engineer or a comparable qualification.
- Knowledge of control technology, e.g. Siemens 840D SL, is desirable.
- Independent and precise way of working, as well as a strong technical understanding.
- Ability to work in a team and a high level of motivation for the continuous improvement of various processes.
- Class B driver's license.

Your Tasks:

- Varied assembly work at our modern company location.
- Installation, commissioning and testing of machines and systems at our customers' sites, both domestically and abroad.

We Offer – More Than Just a Job

Performance-based compensation and attractive benefits
30 days of paid vacation plus additional special leave
Diverse training and personal development opportunities
Flat hierarchies and streamlined decision-making
Open corporate culture with direct communication and teamwork
